SUMMARY

Senior Backend Engineer with 5+ years of experience in designing and delivering enterprise workflow and integration solutions across banking and corporate environments.

Proven expertise in IBM BPM-based workflow architecture, integration services, RESTful API design, rule-based decision logic, and centralized document management via CMIS.

Experienced in leading backend teams, writing technical design documents, and collaborating with cross-functional stakeholders to deliver scalable, maintainable backend systems in high-availability enterprise environments.

WORK EXPERIENCE

HPT Vietnam Corporation - 03/2020 - Present

Backend Engineer

Designed and delivered enterprise workflow and integration systems for banking and large enterprise clients.

Key Responsibilities:

- Designed and implemented IBM BPM-based workflow systems supporting complex business processes.
- Architected and developed Java/Spring Boot integration services exposing RESTful APIs for external systems.
- Designed workflow persistence models and database schemas to support long-running transactions and complex business states.
- Built centralized document management integration via CMIS.
- Architected and defined rule-based decision logic tailored to business

-
- requirements across multiple enterprise workflows.
 - Designed RBAC models and user permission management modules.
 - Developed master data configuration modules and external service configuration management systems.
 - Standardized API response format and error-handling strategy across projects.
 - Wrote technical design documents, API specifications, and integration architecture documents.
 - Collaborated with business analysts and infrastructure teams to translate functional requirements into scalable and compliant technical architectures. \
 - Led a backend team of 4 engineers, conducted code reviews, and ensured architectural consistency and quality standards.
 - Designed modular Spring Boot backend architecture tailored to each project while maximizing reusability.
 - Supported production deployment across enterprise WebSphere/Tomcat environments.
 - Diagnosed and resolved production issues related to workflow execution, integration timeouts, and external service failures.

PROJECT HIGHLIGHTS

Banking Workflow Integration – Eximbank (2024–Present)

- Architected centralized API gateway integrating IBM BPM with core banking subsystems to unify workflow execution and core banking operations.
- Defined API standards, error-handling strategy, and authentication mechanisms to ensure reliable and secure inter-system communication.
- Collaborated with functional analysts and stakeholders to translate complex business rules into scalable backend solutions.

Enterprise Sales & Procurement System – Nghi Son Steel (2022–2023)

- Implemented end-to-end BPM workflows for sales and purchasing processes.
- Built Spring Boot APIs integrated with Alfresco CMIS for document lifecycle management.
- Refactored high-complexity stored procedures, improving query performance by ~30% under peak load.

Identity & Access Management – Banking & Insurance (2020–2021)

- Built integration adapters for synchronization between Active Directory, AS400, HR/CRM systems.
- Designed centralized RBAC model and automated provisioning workflows via Oracle IAM connectors.
- Implemented rule-based access approval and authorization flows.

TECHNICAL SKILLS

Languages

- Java (5+ years)

Backend & Architecture

- Spring Boot, RESTful API design
- System integration design, API contract standards
- Workflow orchestration and modeling (IBM BPM)
- API gateway and enterprise integration patterns

Enterprise Systems

- Business rule engines and decision logic
- RBAC & enterprise identity integration
- Process state persistence and long-running transaction handling

Databases

- Oracle, PostgreSQL (tuning & optimization)

Document Management

- CMIS (upload/retrieve/delete centralized files)

Leadership & Consulting

- Technical design documentation
- Cross-team collaboration with analysts & stakeholders
- Code review and mentoring
- Team leadership (4 engineers)

EDUCATION

10/2015 – 12/2019	University of Science – Vietnam National University, Ho Chi Minh City B.Sc. in Computer and Embedded Systems
-------------------	--

ACHIEVEMENTS

- 🏆 Outstanding Employee – Q3/2024 (Eximbank BPM project)
